

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-20. (CANCELED)

21. (previously amended) A client computer system for synchronizing data records stored on the client computer system with data records stored on a server system, the client computer system comprising:
a database for storing the data records; and
a processor coupled to the database for creating setup information to the server system, wherein the setup information enables the server system to identify the client, to identify where to find information the server system needs for synchronization and to provide appropriate commands for the client.

22. (original) The client computer system of claim 21, wherein the system further comprises means for detecting a changed record in the client database, and means for transmitting the changed record to the server system.

23. (original) The client computer system of claim 22, wherein the processor further for executing a program compiled and transmitted by the server system, wherein the program updates and synchronizes the data records stored in the database.

24. (original) The client computer system of claim 23 further comprising means for downloading and starting the program.

25. (original) The client computer system of claim 21, wherein the client is one of a mobile phone, a handheld computer, and a personal digital assistant.

26. (previously amended) A server system for synchronizing data records stored on the server system with data records stored in a client computer system, the server system comprising:

means for receiving setup information from the client computer system, wherein the setup information includes information to enable the server system to identify the client computer system, to identify where to find information the server system needs for synchronization and to provide appropriate commands for the client computer system;

memory for storing the setup information coupled to the means for receiving;

a processor coupled to the memory; and

a database coupled to the processor for storing the server system data records.

27. (original) The server system of claim 26, further comprising means for receiving a changed data record from the client computer system;

wherein, the setup information further describes a format of the data records stored in the client computer system, and the processor interprets the changed data record from the client computer system using the setup information, updates the database, and compiles a program comprising object code executable by the client computer system to update the client data

records.

28. (original) The server system of claim 26 further comprising means for detecting a changed data record in the database;
wherein, the processor updates the database and compiles a program comprising object code executable by the client computer system to update the client data records.

29. (original) The server system of claim 28 further comprising means for transmitting the program to the client computer system.

30. (CANCELED)

31. (previously canceled)

32-37. (CANCELED)

38. (previously canceled)

39-43. (CANCELED)
